

About us

Hey, we're Nura! We are the creators of the world's smartest headphones which automatically learn and adapt to your unique hearing, delivering incredible immersion and clarity. Learn more about us and our products at www.nuraphone.com or try them for yourself at our pop-up store in Melbourne Central.

Our headphones have won awards including Best of Innovation Award at CES (2018) and the 2018 Red Dot Design Award. You can read about us in places such as [Wired](#), [Forbes](#), [Unbox Therapy](#), [Engadget](#) and [TechCrunch](#). We recently launched our hardware subscription service NuraNow and we're in the final stages of launching our second product, the NuraLoop.

We're a team of music lovers working across creative, engineering, hearing science, customer support, finance, logistics, marketing, PR, retail and more. We're based in Brunswick, Melbourne with some global operations in Shenzhen, London, California and more.

About the role

We're looking for a Mid-Level Developer to join Nura's Digital Experience team. You'll be joining a team that is responsible for the development of our eCommerce platform, website, app, and internal tools and cloud infrastructure.

You'll be working with modern technologies such as CloudFlare Workers, AWS Lambda and Flutter to create world-class solutions to a wide range of challenging problems. This role is within a small team of passionate developers, delivering meaningful change to customers and the organisation from day one.

In this role you'll also enjoy a lot of variety – from developing cutting edge front end experiences to building the backend that powers our eCommerce platforms and subscription services. In other words, you'll be working across the entire tech stack.

Requirements

- A wide variety of experience across web, cloud and app development

Our tech stack

- A variety of Rails apps running on EC2 and Elastic Beanstalk
- AWS infrastructure including RDS (Aurora, MySQL), ElastiCache (Redis), Lambda (Python), Fargate (Docker, Python), Firehose/Kinesis/Glue, Athena, EC2, Elastic Beanstalk, SES
- CloudFlare (DNS, CDN and Workers)
- Webflow
- HTML5, SCSS, JS
- Shopify
- iOS (Swift, Objective-C, C and C++)
- Android (Kotlin, Java, C and C++)
- Flutter (iOS and Android)

Perks

We offer a catered team lunch every Monday, free coffee, a beautiful open space office located in Brunswick and a free gym and pool membership at Brunswick Baths. We end the week by celebrating our achievements and listening to music over beer, wine and cheese in our Nura Lounge. Music is part of Nura's DNA and we collaborate frequently with local and international artists which provides regular opportunities to get free or discounted access to gigs and events.

To apply

Please send your CV and a cover letter telling us a bit about yourself and why you are interested in the role at Nura to:
